

Field Equipment

Pattison's largest tow between wagon, features a tank capacity of 5200 gals.

Field
Equipment

Thanks to Pattison Liquid Systems for engineering an awesome liquid fertilizer wagon. Our 5210 TB tank equipped with the large dual tire package and a 13hp liquid fertilizer pump makes our farming operation run smooth, fast and efficient as possible. The large carrying capacity of this unit simplifies the job to cover many acres every day and the high flotation tires makes it easy to pull with little effort.
