

## Liquid Fertilizer Distribution Systems

Pattison Liquid Systems has been supplying the liquid fertilizer industry for over 35 years with distribution kits, that will deliver a precise even application

*We run two Pattison kits on our Conservapak drill. A VR for the nitrogen and sulphur side banded and an SP kit for our Phos seed placed. They are sent out with everything you need to install them, mount easily, low maintenance and are very accurate. What more could you ask for.*
