

Storage Tanks

Dealer discounts do not apply to tank pricing.

Pattison FERTANK

STANDARD FEATURES:

- Large capacity - Holds a complete B-train load of liquid fertilizer...with room to spare
- Lower cost - Polyethylene FERTANK costs significantly less than steel or fiberglass tanks
- Corrosion proof - Fertilizer will not corrode the polyethylene material. Inner and/or outer coating (or maintenance re-coating) are not required
- Heavy duty - The FERTANK is designed to store fertilizer, with a thicker wall than standard poly tanks to accommodate fertilizer's greater weight
- Durable - Polyethylene is a very durable material with a long, maintenance free, life
- Easier to move - Polyethylene is lighter than steel so the tanks are easier to move and transport
- Molded in lugs - Provide a convenient attachment point for loading or moving lifting empty tanks and for holding down tanks during transport or on site
- Lid - Large 22" diameter lid
- Fittings - 3" threaded fitting standard. 1" through 4" fitting available
- Vent - Standard vent located on top of tank
- 1" of sidewall is approximately 65 gals.
- Comes with either 2" or 3" Banjo valve packages

DESCRIPTION	PART#
FERTANK 8250 Imp. gal. tank	QMP706831

Tank Lids

DESCRIPTION	Part #
16" vented lid	QP30006-1
16" Hinged Lid	QP300131
22" non vent lid	QP300271

Strainer Baskets

DESCRIPTION	Part #
8" plastic mesh	QP30009-1
12" plastic mesh	QP30010-1
16" plastic mesh	QP30011-1

Tank Repair Kit

DESCRIPTION	Part #
Tank Repair Kit	ZZMD40W
Role of plastic repair wire (50')	ZZT1
