

The Pattison Inductors will greatly reduce fill times allowing you to spend more time spraying

*I saw your Pro at a dealership and when we were setting up a new truck I said to the guys, that's what we need. It has the motor, mix tank, and flowmeter all in one package, you're not going to build anything better or more efficient than that. It has sped things up a lot, we have two sprayers running off of one truck and it has really increased our production.*

*- Matt Banbury - Sprayer operator, Land and Sky Grains Inc, Grenfell SK (As pictured above)*
