Portable Liquid Fertilizer Storage Solutions

FERTANK Transport System

The custom built transport frame, allows the operator to easily move the Pattison FERTANK from farm to field.

*Only transport the tank empty.

Standard Features

- Heavy duty tubular frame – 2" x 8"
- 3000 lb. hub and spindle assemblies
- Two hydraulic cylinders, easily lifts the tank from field to transport position
- Weight of frame and empty tank – total 4300lbs
- 15" Tires
- Clevis style hitch
- Frame is 156"W x 255"L
- Overall height with tank – 160"

Custom Designed on Farm Pumping System

This blending station allows the operator to quickly blend fertilizer from multiple tanks. The 3" Banjo poly pump is powered by a 7.5 HP electric motor and product is accurately measured through the 3" Banjo flow meter. The system is also designed to fill and unload trucks, empty and recirculate product from multiple tanks. Pre-assembled on the powder coated stand, it will look new and withstand many years of use in the corrosive environment.

Portable Liquid Fertilizer Storage Solutions

Pattison Field Storage Unit, is available in the triple tank configuration with a total capacity of 9000 usg. The unique hydraulic jack system easily raises and lowers tank platform. The 3" plumbing allows for quick load and unloading with the tanks having a 10 degree cone bottom to ensure a total drain. Only transport the tanks empty.

Standard Features

- 2"x6" tubular heavy duty frame construction, powder coated
- 20,000lb. Clevis hitch, with 7 pin highway light package
- Hydraulic jacking system
- 10 degree cone bottom tanks, equipped with sight gauges
- 235/80R16 hwy tires with 3500 lb. Ag spindles
- Dry weight 4070lbs.
- Dimensions, 29' long x 100" wide x 158" raised height

PowerPro Pumping System

Achieve more flow (up to 440 GPM), with more horsepower and greater efficiency than other 3" transfer pump on the market! The Hypro 3" poly transfer pumps significantly reduce fill time. Ideal for nurse tank transfer and other closed system applications. Powered by the 13HP Power Pro motor this pump with a polypropylene housing was specifically designed to work with most chemicals and corrosive liquids.
