

Pattison Inductors

Pattison Inductor Pro, Spray Management Systems, Fast and Accurate

Pattison Inductors

The next generation of spray management systems, that greatly reduces sprayer fill time, allowing the operator to spend more time spraying. The high capacity induction system, can be attached to up to 3 separate bulk containers at the same time. As the sprayer is being filled through the 3" fill line, product is inducted straight in to the fill line. Product that is being drawn from each bulk container is metered. The on board batch tank, also allows the operator to empty and rinse jugs quickly. This systems can be easily integrated into existing systems.

Dimensions - 60"W x 48"D x 42"H
Weight - 210 lbs.

Batch tank with a capacity of 30 USG, allows for the easy mix of powders and liquids. The tanks rinse system, with integrated fresh water quickly cleans jugs removing all contents of the tank.

Placed on a poly pallet, the corrosion resistant powder coated painted components will look new for many years to come. Instructions are placed on panel for easy access and readability.

Proven performance - powered by a 13 hp PowerPro electric start motor the 3 in. Hypro pump will deliver up to 440 gpm.

High quality Banjo 3 in. leak proof manifold style fittings will provide years of trouble free service. Raised handles on all valves for easy maneuvering.

Integrated venturi systems allows the operator to be connected up to three totes at one time. This high capacity venturi will draw product from the bulk containers quickly, getting all the product on board before the sprayer tank is filled with water.

Raven FLOmax 110 combined with the Raven RFM 60P meter displays metered units in US gallons or litres. One Step calibration with accuracy of +/-1%, is compatible with most agricultural products. Will calculate flow rates, batch and total volumes.

Available as an option is the Flomax 810. The Flomax 810 when integrated with a shutoff valve, allows the operator to pre programme a batch volume. When the correct amount of product is measured out the Flomax 810 will automatically close the intake valve.

Inductor Pro Spray Management System

DESCRIPTION	PART #
Inductor Pro Spray management system	PPPRO
Inductor Pro c/w 810 monitor and valve shutoff package	PPPRO-EVO
